DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Choose one of:

- A1. An LCOS display having refraction, reflection by oblique reflectors, and refraction [Fig. 2, for instance; cf. claims 4-7 and 16-18].
- A2. An LCOS display having refraction, reflection by optical gratings, and refraction [Fig. 7, for instance; cf. claims 8-11, 19, and 20].
- A3. An LCOS display having refraction, refraction by transparent elements, reflection at a planar surface, refraction by transparent elements, and refraction [Fig. 13, for instance; cf. claims 12-15 and 21-23].

Choose one of:

- B1. The reflector is a reflective metal [cf. claims 5, 9, and 13].
- B2. The reflector is a reflective multi-layer coating [cf. claims 6 and 10].

Choose one of:

- C1. The transparent conductor is connected to the pixel electrode through the reflectors [Fig. 4, for instance; cf. claim 2].
- C2. The transparent conductor is connected to the pixel electrode directly [Fig. 2, for instance; cf. claim 3].

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, the claims not referred to above are believed to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Schechter whose telephone number is (571) 272-2302. The examiner can normally be reached on Monday - Friday, 9:00 - 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H. Kim can be reached on (571) 272-2293. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
